Propharma,  
P.O. Box 4368,  
DANDENONG SOUTH. 3164  
Vic.

Dear Propharma Team,

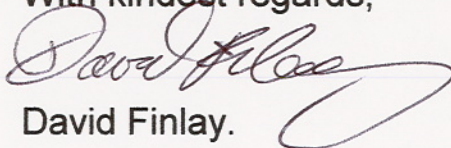

Following a conversation with Dr Geoff Irish at the Gippsland Field Days (Lardner Park) we made the decision to trial your product Weather Shield Dry Cow in an attempt to assist with the problems we were having each year with Milk Fever in our Spring calving herd of Jerseys.

I am happy to report that I have enjoyed the most relaxed Spring calving for decades with few cows showing the symptoms of metabolic disorders, and this in a year when many farmers around were complaining of a bad year for Milk Fever.

Further with the cows not suffering from the setback of Milk Fever they have returned the highest per cow production for this herd in the first two spring tests in more than 30 years of herd testing.

Am I happy with the product? YES.  
Will I use it next year? YES again.

With kindest regards,

  
David Finlay.
